From the Editor

As announced before, we are about to hold elections to the Board of our Society. In accordance with our Constitution and Bye-Laws, a Nominating Committee has now been created which will propose candidates from the three regions: (a) Asia, Australasia and Oceania; (b) Europe and Africa; and (c) North, Central and South America. Some retiring current members of the Board will be eligible for re-election, there will also be new names on the list of the nominees. Four members from each region will ultimately be elected, thus the total of twelve members. All candidates will be invited to provide very short statements and brief biographies to be circulated to all members of the Society. Only current members of ICS will be able to vote so if you have not yet renewed your membership for 2022/2023, please follow the instructions at the bottom of this cover page. It is expected that the results of the elections will be announced in the March 2023 issue of the ICS Newsletter. At the first meeting of the new Board in 2023 the officers will be elected for the next term of office.

The next conference to take place for our community is CEFC, the 20th Biennial Conference on Electromagnetic Field Computation, 24-26 October 2022, Denver, Colorado. This will be a fully virtual event.

Preparations for the next Compumag, to be held in Kyoto, Japan, in May 2023, are in full swing. Please consult the conference website (as shown on the cover page) for up-to-date information and news.

At the start of the new academic year, may I wish all members a successful year ahead!

Jan Sykulski

Dear Colleagues,

COMPUMAG 2023, the 24th International Conference on the Computation of Electromagnetic Fields, will be held in Kyoto, Japan, May 22-26, 2023.

Since its creation in 1976, COMPUMAG has been one of the most important events in the field of computational electromagnetics for researchers all over the world to present their latest research advances, to share experiences, to exchange new ideas and to expand their professional networks.

The aim of COMPUMAG 2023 is to discuss recent developments and practical applications in the numerical computation of electromagnetic fields for engineers and physicists engaged in the design and analysis of electromagnetic devices and systems.

With your valuable contribution and active participation, we believe that you will benefit from the excellent quality of technical presentations and fruitful discussions, experience pleasant moments by meeting friends/colleagues and establishing new scientific relationships and networking.

On behalf of the board of International Compumag Society, the organizing committee and the editorial board, we sincerely welcome you to Kyoto to attend the COMPUMAG 2023.

Sincerely,

Professor Matsuo Tetsuji
General Chairman

Important dates

Two-page digest submission due: 9th November 2022

Notification of acceptance: 11th February 2023

Early-bird registration due: 27th February 2023

4-page full paper for IEEE Transactions on Magnetics due: 11th June 2023

<https://www.compumag2023.com>

Contents:

COMPUMAG 2023	1
IGTE Symposium 2022	2
Paradoxes of Homogenization (technical article)	3
COMPEL	17
CEFC 2022	18
ISEF 2023	18
Intermag 2023	19
MMM 2022	19
MMM 2023	19
CEM 2023	20
Future events	20

Renewing ICS membership for 2022/2023

If you have not yet done so, please renew your membership for the coming year 2022/2023 by going to the following web page

<https://store.southampton.ac.uk/product-catalogue/faculty-of-engineering-and-physical-sciences/school-of-electronics-and-computer-science/international-compumag-society-ics-subscription-renewal>

and completing the 'transaction' on-line. Please note that the membership year runs from 1st August each year.

ICS Secretary
