1 March 2024

From the Editor

Welcome to another edition of the ICS Newsletter. You will no doubt have noted that as a Society we have just entered the fourth decade of our existence – yes, the International Compumag Society was created in 1993! I remember well the early days, but younger members may have joined more recently. In fact, I know that the majority of our members are young researchers and this is very encouraging.

The next big event in our calendar is IEEE CEFC, to take place in the beautiful island of Jeju in Korea. You will find information on the cover page (on the right-hand side) and necessary links to the dedicated website. The venue is rather far away for many of us, but I am hoping many members will be able to make it. Obviously, our colleagues in Asia I am sure will be well represented!

But we are already looking forward to next year and to visiting Naples, Italy, to attend Compumag 2025. Our Italian friends are very busy organising the meeting and I can assure you, it all looks good! The Board of the Society is of course closely involved, and we have meetings and discuss various aspects of the conference all the time. I am sure it will be a memorable event (see more information on page 2).

There are other events later this year, and next indeed year, which are relevant to our community, in particular EPNC in Portoroz, Slovenia, in June 2024, IGTE Symposium in Graz, Austria, in September 2024, and – last but not least – CEM in Bruges, Belgium, in April 2025 (not to mention Compumag in May 2025!). We are all going to be very busy!

I wish you all a successful second half of the academic year 2023/24.

Jan Sykulski

Contents:

Modelling of electromagnetic phenomena within laminate composite materials (technical article)	3
IGTE 2024, Graz, Austria	15
CEM 2025, Bruges, Belgium	16
Future events	16

Welcome to CEFC 2024, Jeju, Korea!

It is our great pleasure to welcome you to the 21st Biennial IEEE Conference on Electromagnetic Field Computation (IEEE CEFC 2024), which will be held in Jeju, Korea, June 2 - 5, 2024. This conference will be a full face-to-face one, and we hope, by then, Covid19 will be completely forgotten from our minds, and it will be an opportunity to be with our colleagues we haven't met for a long time. The conference will be cosponsored by IEEE Magnetics Society, Korean Institute of Electrical Engineers- Electric Machines and Energy Conversion System Society, and Chungbuk National University.

This IEEE conference focuses on the latest developments in modelling and simulation methodologies for the analysis of electromagnetic fields and wave interactions, with applications emphasis on computer-aided design of low and high frequency devices, components, and systems. We strongly believe IEEE CEFC 2024 will be a great opportunity for participants to exchange the latest information, ideas, and experiences in computational electromagnetics and related fields. And your contributions of papers and presentations as well as participation will surely make the event even more fruitful.

Also, our participants will have the chance to explore the beautiful Jeju Island while joining the social activities we have planned for you. Jeju Island is a popular tourist destination among domestic and international travellers for its beautiful and pristine natural scenery. It is a unique place worldwide, holding the honours of the natural science area such as UNESCO World Biosphere Reserve [2002], UNESCO World Natural Heritage Site [2007] and UNESCO World Geoparks Network [2010]. Jeju Island also consists of all elements for global natural sight theme, including island, volcano, waterfall, beaches, national park, cave and forest.

With your active participation and support, we believe IEEE CEFC 2024 will be a memorable and rewarding experience to us all.

We look forward to seeing you in Jeju, Korea.

Best Regards,

The Organizers
