Newsletter

Volume 33 No. 1

ISSN 1026-0854

1 March 2026

From the Editor

Following the recent elections, the new ICS Board had a meeting recently at which the officers were elected or confirmed for the next three years. The list of the officers may be found on the right-hand side of this cover.

There are a number of initiatives which the new Board is pursuing, including an event at IEEE Intermag 2026, to take place in April 2026. This has been designed as a meeting between the designers of electrical machines and those involved in developing software and methodologies, under the banner of 'the real world meets the virtual world'. Please see the back cover of this Newsletter for more information. All members of the Society are encouraged to attend this Symposium.

As you may have noticed, the ICS Website is back and we are hoping to develop it further. I would strongly suggest that you read the message from our President regarding the future plans and intentions (see page 2).

There are several conferences coming up this year so do follow the links provided and select the meetings of particular interest to you. It's going to be a busy year!

We still have wonderful memories from Compumag Naples last June, but our thoughts are already focused on the next event in Cancun in 2027. From the next edition of the Newsletter, we will be bringing you all the news and information about the conference, the venue, submission of papers, etc. Please watch this space!

Jan Sykulski
