International Compumag Society

Newsletter

Volume 33 No. 2 ISSN 1026-0854 1 July 2026

From the Editor

Welcome to another year of membership of the Society, starting on the 1st August. Those who attended the event in Naples last year and paid full registration fee will have their membership renewed automatically, otherwise please follow the instructions on the right how to pay the dues.

Two important conferences took place in June, IEEE CEFC in Thessaloniki, Greece, and EPNC in Tallinn, Estonia. Both meetings offered splendid opportunities for networking, and the social programmes were very rich and enjoyable. A big thank you to the organisers for their efforts and for creating very friendly atmosphere. You will find a few photographs from both events inside this Newsletter to bring back some wonderful memories.

Before that, in April, the IEEE Intermag conference was held in Manchester. A day before the event started, we organised – in collaboration with the IEEE Magnetics Society – a special Symposium under the title Electrical Machines: Are Real World Challenges being addressed by Simulation Systems. Several distinguished speakers contributed, and the meeting was very well attended. The Magnetics Society suggested that we could have another workshop ahead of Intermag 2027 in Jeju, South Korea. The topic of this Symposium is likely to include Machine Learning in electromagnetics.

Our attention is slowly focusing on the next Compumag conference which will take place in November 2027 in Cancun, Mexico. The two-page digest submission is due by the 8th May 2027. I will of course keep you updated on the progress with preparations, but you may wish to consult the conference webpage on a regular basis. Please read the personal invitation to the conference from its Chair. I hope to see all ICS members in Cancun!

November 14-18, 2027. Cancun, Mexico

Compumag 2027

Dear Colleagues,

COMPUMAG 2027, the 26th International Conference on the Computation of Electromagnetic Fields, will be held in Cancún, México, 14-18 November, 2027. Since its creation in 1976, COMPUMAG has been one of the most important events in the field of computational electromagnetics for researchers all over the world to present their latest research advances, to share professional experiences, to exchange new ideas and to expand their professional networks.

The aim of COMPUMAG 2027 is to discuss recent developments and practical applications in the numerical computation of electromagnetic fields for engineers and physicists engaged in the design and analysis of electromagnetic devices and systems.

With your valuable contribution and active participation, we believe that you will benefit from the excellent quality of technical presentations and fruitful discussions, experience pleasant moments by meeting friends/colleagues and establishing new scientific relationships and networking. On behalf of the board of International Compumag Society, the organizing committee and the editorial board, we sincerely invite you to Cancún to attend the COMPUMAG 2027.

Prof. Marco Antonio Arjona
General Chairman

Renewing ICS membership for 2026/2027

If you have not yet done so, please renew your membership for the coming year 2026/2027 by going to the following web page

https://store.southampton.ac.uk/product-catalogue/faculty-of-engineering-and-physical-sciences/school-of-electronics-and-computer-science/international-compumag-society-ics-subscription-renewal

and completing the 'transaction' on-line. Please note that the membership year runs from 1st August each year. Please note also that if you attended Compumag Naples in June 2025 and paid the full (non-discounted) registration fee, then your membership will be renewed automatically. However, the reduced fee did not include the ICS dues.

ICS Secretary
